Total number of children during the data gathering years 2012-2015
N = 1,133

Children excluded because of prematurity and genetic disorders
n = 144

Children with milder forms of CHD not included in the follow-up program for children with severe CHD
n = 890

Invited purposely in order to have comparable group sizes
n = 432

Children in the follow-up program
n = 99

Children excluded
n = 9

Children participating
n = 237 (44.9%)

Children completing testing with Wechsler Scales
n = 228 (42.9%)

Mild CHD
n = 247

Moderate CHD
n = 185

Severe CHD
n = 99

Moved, do not speak Swedish, did not want to participate

Mild CHD
n = 77 (31.2%)

Moderate CHD
n = 81 (43.8%)

Severe CHD
n = 79 (79.8%)
